Sir:

RESPONSE TO RESTRICTION REQUIREMENT

Applicants respond as follows to the Restriction Requirement as set forth in the Office Action dated October 3, 2000.

Applicants respectfully request reconsideration of the Restriction Requirement. In particular, it is believed the following three Groups could be examined together with undue burden: Group I ("methods of using human neutral sphingomyelinase to identify compounds that interact with it"), Group II ("an isolated human neutral sphingomyelinase") and Group V, ("sperm and seminal fluid samples comprising human neutral sphingomyelinase"). As noted in the Restriction, those Groups have

overlapping classification; hence, the search and examination of those Groups together should not impose an undue burden.

However, to provide a complete response, Applicants hereby elect with traverse Group I as set forth in the Restriction, which presently includes claims 13-17, and described in the Restriction as "Methods of using human neutral sphingomyelinase to identify compounds that interact with it." The present election is made solely to comply with the Office Action and should not be construed as a surrender of any subject matter in the application. The right to file divisional applications on the non-elected claims is reserved.

Early consideration and allowance of the application are earnestly solicited.

Respectfully submitted,
